

GVS Filtration is a Corporation that aims at the growth and continuity of its operations, pursuing group profitability and customer satisfaction. Everywhere in the world, GVS seeks to meet the customer expectations in a coherent and timely manner.

GVS Filtration promotes a competent, aware, safe and supportive organizational context, where motivation grows in a multicultural environment that respects ethical values, laws, sector, safety and environment regulatory requirements.

GVS Filtration offers innovative products and solutions with high technological content in critical markets and applications with high performance requirements for the safety and comfort of the user.

GVS Filtration pursues the satisfaction of all the interested parties, using, in all areas and business processes, a circular approach to continuous improvement based on the analysis of risks and opportunities, and on the systematic verification and comparison with the environment and the reference markets.
