

# QUALITY POLICY

GVS is a Company that aims to the sustainable growth and continuity of its operations, pursuing group profitability, quality and customer satisfaction.

Everywhere in the world, GVS seeks to meet the customer expectations in a coherent and timely manner.

GVS promotes a competent, aware, safe and supportive organizational context, where motivation grows in a multicultural environment; commits to respect ethical values and to comply with applicable regulations, quality, safety and environment regulatory requirements.

GVS offers innovative products and solutions with high technological content in critical markets and applications with high performance requirements for the safety and comfort of the user.

GVS is committed to maintain the effectiveness of its Quality Management System, sets quality objectives to pursue the satisfaction of all the parties involved.

It is applied a circular approach to continuous improvement in all areas and business processes, based on risks and opportunities analysis, and on the systematic verification and comparison with the environment and the reference markets.

The continuous suitability of this quality policy is regularly reviewed and its content is made available to interested parties and communicated to the Organization for its full understanding.
