

# FLAME PETTE LIQUID HANDLING PRODUCT COLLECTION

### The GVS Group

In over 45 years of history, GVS has evolved from a supplier of components for the healthcare sector to a global group that produces highly technological diversified filtration solutions.

### Wide range of products and custom design expertise

GVS produces a wide range of filter materials, filters and off-the-shelf components in all its divisions, enabling its customers to reduce the design time for new product launches.

All the GVS divisions work in highly regulated environments and the group therefore operates with extremely high-quality standards. Thanks to its research and development centres located all over the world, GVS is also able to offer an extremely efficient and personalized service to meet its customers'needs: from product conception and design to testing and mass production.

### Dynamic and flexible structure

GVS has developed a streamlined, dynamic and technologically advanced structure that has made it possible to achieve constant and balanced growth. The Group currently employs a total of 4869 people who work in automated assembly departments, in lines for the production and processing of filter membranes and in class 10,000 and 100,000 cleanrooms.

### **Global growth**

The GVS Group has always paid great attention to research, development and innovation of its products and processes and has shown a strong trend towards development in global markets since its foundation.

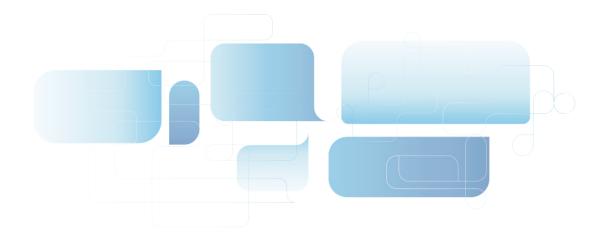

In addition to the corporate headquarters in Bologna, GVS currently has 19 plants in Italy, United Kingdom, Brazil, United States, China, Mexico, Romania e Puerto Rico, and 29 commercial offices located all over the world. GVS has always adopted a "glocal" approach: it operates locally in contact with its customers, but relies on the strength of a global network.

### Fully Autoclavable Adjustable Volume Pipette

#### Features

- Wide volume range of 0.1µL to 10mL
- Ergonomic design allows comfortable grip and fatigue-free pipetting
- 4-digit volume display offers high display accuracy of up to 0.002µL
- Color-coded control button allows for easy identification of different volume ranges
- Volume lock to prevent accidental changes during use
- Each pipette is calibrated in accordance with IS08655 and shipped with individual test certificates
- Easy calibration without using any accessory tools
- Broadly compatible with various pipette tips on the market
- Easy to dismantle and maintain
- The centrally positioned view window ensures effortless volume reading and adjustment, providing convenience for both left- and right-handed users.
- Constructed with premium materials, the pipettes are fully autoclavable without disassembly, UV sterilizable, and highly resistant to chemical corrosion

The GVS new generation fully autoclavable mechanical pipette has the best ergonomic design and ultralight weight. It has been designed keeping in mind the human form and human factors to offer smooth and effortless ergonomic pipetting experience.

### Single-Channel Adjustable Volume Pipette

#### **Features**

- Ergonomic design provides good hand grip, and combined with ultra-light weight offers fatigue-free pipetting
- Low operating force required for control button avoids repetitive strain injuries
- Ergonomically positioned ejector button with low plunger force for easy tip ejection
- Dispensing volume range of 0.1ul-10ml
- Color codes on top to easily identify different volume ranges
- Large 4-digit volume display offers high display accuracy of up to 0.002ul
- Centrally placed view window makes volume reading and adjustment easy for both left and right-handers
- Elastic tip cone ensures perfect seal with tips and allows for easy tip removal
- Each pipette is calibrated in accordance with ISO8655 and shipped with individual test certificates
- Durable material offers excellent temperature and chemical resistance
- The lower section can be autoclaved
- Easy to dismantle, and maintain
- Comes with tool for easy calibration

### **Pipette Stand**

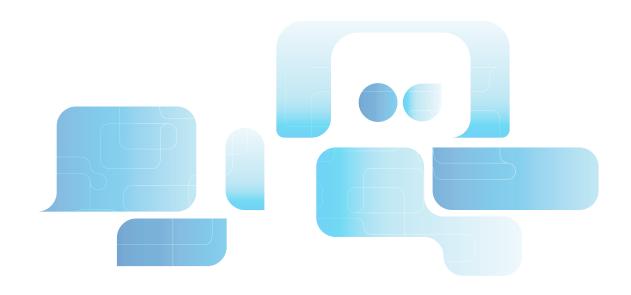

GVS pipette stand holds up to six single or multichannel pipettes, protecting them from contamination. It is detachable and compatible with all major pipette Brands.

### **Features**

- Compact design; Occupies less bench space
- Compatible with all Major Pipette Brands
- Hold up to 6 single and multi-channel pipettes
- Special Notch Design ensures Compatibility & Easy Retrieval

Product Code	FLPFGPS030A
Positions	6

### Multi-Channel Adjustable Volume Pipette

The use of a multi-channel pipette can greatly improve efficiency and reproducibility for lab scientists working with microplates. Working with 8 channels substantially reduces the number of pipetting steps and improves work efficiency dramatically.

#### **Features**

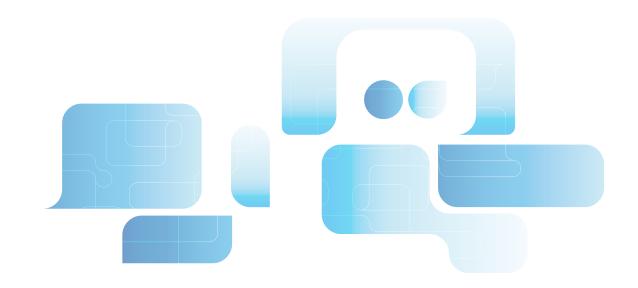

- Ergonomic design allows comfortable grip and fatigue-free pipetting
- 4-digit volume display provides accurate volume setting and easy visibility
- Wide volume range: from 0.5~300µL
- Enjoy minimal tip attachment and ejection forces, minimizing the risk of repetitive strain injuries
- The lower part is autoclavable (at 121°C) to ensure sterility and avoid cross contamination
- The lower part can be rotated to 360 to suit personal preference.
- Easy to disassemble the lower part for replacement or cleaning
- Color-coded control button helps to identify different volume ranges easily
- Equipped with O-ring on the tip cone to ensure a tight seal

### **Application**

A multi-channel pipette is especially used in high-throughput experiments, where multiplesamples or assays need to be processed quickly and accurately. Some common applications of a multi-channel pipette include

• Clinical Diagnostics Labs • Biotechnology Labs • Environmental Labs • Food Testing Labs • Chemistry Labs

## GVS 6/8/12 Channels Variable Spacing Electronic Pipette

#### **Application**

The newly launched Variable Pitch Pipettes are available in 3 models of 6, 8 and 12 channels, covering all positions from 4.5mm to 19mm, making it easy to switch between different sizes of vessels, reducing the workload, saving time and greatly improving the reproducibility of experimental results.

- Use a tube rack
- Blood analysis
- Rearrange the orifice plates
- Cell plating

• Gel loading

• Cell culture

## **Pipette Tips**

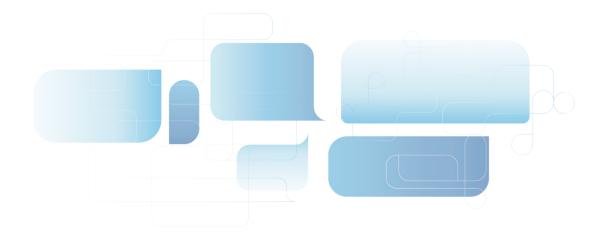

### **Pipette Tips**

GVS provides a variety on pipette tips from standard to extra-long design, in different packs of them, bulk/rack/refill, with or without filter and low retention types.

All sterile products are irradiated electron beam radiation, which is the same level as gamma irradiation but less harsh on plastics than radiation and does not leave toxic residues like gas sterilization usually does to the product.

All our sterile pipette tips are manufactured out of the highest-grade resins and are certified to be RNase, DNase, DNA, pyrogen, and ATP free. Our non-sterile tips are made from the same high-quality resins and are certified RNase and DNase free as well.

### **Low Retention Pipette Tips**

Low Retention pipette tips are specifically designed for applications requiring high accuracy and reproducibility, especially pipetting viscous liquids in complex reactions such as PCR, RT PCR, and DNA sequencing. Pipetting viscous liquids also creates pipetting problems due to the inability to expel fluid because of surface adhesion between the liquid and the inside of the pipette tip. This fluid retention can be quite a problem because residual liquid typically remains in the pipette tip after the operation.

#### **Features**

- Improves Sample Accuracy.
- Increases Reliability.
- Saves Expensive Reagents.

### Pipette Tip (Large Volume Tips)

- Easy to Use: Sot and flexible material for easy tip loading &ejection, universal filtered pipette fps lower the risk of repetitive stress injury(RSI).
- The smooth inner surface can prevent leakage and residues.
- Convenient & Sterile: Pipette tips rack pack allows direct loading into pipettor without hand touch, higher sterility and efficiency as well as a relief for repeated acts.
- Widely Application Compatible with most brands such as Eppendorf, Biohit, DLAB, Brand, Thero, etc.

### **Robotic Pipette Tip**

GVS offers a wide range of pipet tips for automated robotic workstations like, Tecan, Hamilton, Beckman etc.

All our sterile pipette tips are manufactured out of the highest-grade resins and are certified to be RNase, DNase, DNA, pyrogen, and ATP free. Our non-sterile tips are made from the same high-quality resins and are certified RNase and DNase free as well.

Automated workstations require much tighter tolerances to robotic tips than those of standard manual pipet tips. So, we strongly suggest purchasing pre-sterilized products than non-sterilized products which needs autoclaving, and autoclaving can warp the tips slightly.

### **FLAMETIP Pipette Micro Filter Tips**

#### **Description**

Natural, with filter, sterilized in rack

#### **Purpose**

Use for liquid transfer, zero retention filter.

#### **Materials**

Tips: PP (Polypropylene) Color: Natural

Rack box: PP (Polypropylene)

#### **Features**

- FLAMETIP are manufactured from super clear high quality Polypropylene
- The surfaces of the tips are produced through a special process, this process makes the tip inner surface become super hydrophobic
- Preferred accessories for most brand micropipettor
- Tips with PP filter are also available
- Packaged in re-sealable plastic bags or extra-rigid autoclavable racks
- Every rack or case is printed with lot No. for quality traceability
- Non-Pyrogenic and validated per FDA guidelines on LAL testing for medical devices and company guidelines. The acceptance level for product is less than 0.5 EU/ml
- DNase/RNase-free
- Sterilized by gamma irradiation SAL 10-6(1S011137)
- Shelf life: 3 years after month of production
- Manufactured in a Class 100,000 cleanroom environment
- Manufactured under IS013485:2016 and IS09001:2015 quality management system
- This product has been tested and is free of any detectable Nucleic Acid.
- All material are certified metal-free which compliance with US Pharmacopoeia guidelines.
- This product has been tested and is free of ATP

## **Dispenser Tips**

### **Dispenser Tips**

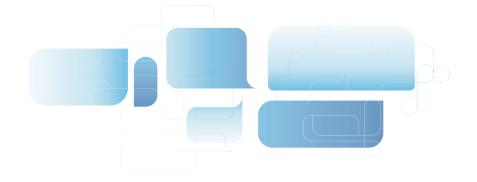

### **Dispenser Tips for Repeating Pipettor**

Manufactured from high-quality virgin plastics, these tips are compatible with most standard repeating pipettes and are suitable for a wide range of applications. They are produced without chemical additives to prevent reagent contamination.

#### **Features and Benefits**

- Precision-engineered seal between piston and cylinder ensures smooth operation, enhanced accuracy, and repeatability
- Extended piston design reduces dead volume and maximizes fluid usage
- Ergonomic funnel-shaped design enables easy handling and protects gloves from damage
- Manufactured entirely from premium virgin high-density polyethylene (HDPE) and polypropylene (PP)
- Utilizes the direct displacement method, offering a safe and reliable solution for dispensing viscous, infectious, and volatile liquids
- Every tip is individually tested during automated production to ensure consistent quality and performance

#### **Specifications**

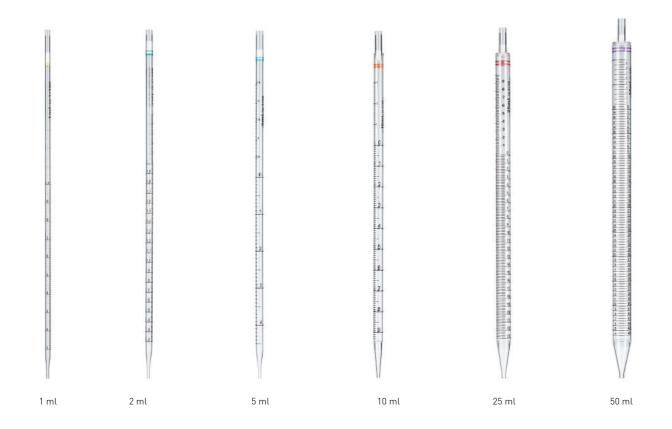

ppeemeations	
Product Code	FLPFGEP101A
Pipette Type	Glass or Plastic Pipette (0.1-100ml)
Speeds	4 levels
Noise	<55db
Display	LCD
Dimension (L*W*H)	56*146*40mm
Weight	235g
Permissible Ambient Temperature	5-40°C
Permissible Relative humidity	10%-95%, No condensation
Atmospheric Pressure	79.5 kPa-106 kPa
Adapter Input Voltage	100-240V AC
Adapter Frequency	50/60HZ
Adapter Output Current	2A
Adapter Output Voltage	5V DC
Battery	Lithium-ion; Voltage: 3.7V; weight: about 40g; capacity: 1600mAH
Battery Life	About 10h
Battery Charging time	About 2h

## **Serological Pipette**

### **Serological Pipette, Plastic**

GVS offers serological pipettes in six different volumes, available individual pack and bulk pack, with general color code for each volume.

All our serological pipettes are manufactured out of the highest grade resins and are certified to be RNase, DNAs, pyrogen, and ATP free.

### **Mini Serological Pipettes**

• Purpose: Use for liquid transfer

Materials:

Pipette: GPPS (General polystyrene), compliance with USP Class VI

Filter: PO (Polyolefin)

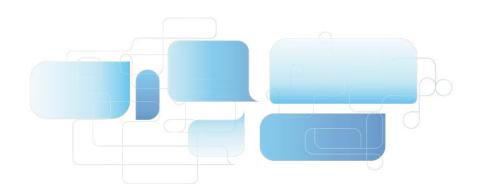

#### **Features**

- Temperature: -20°C to +50°C
- Available in individually packed in peel-to-open wrap
- Negative graduations up to -3mL (total volume = 8mL)
- GraduaTions are calibrated for accurate dispensing to within ±2%
- DNase/RNase free
- Non-pyrogenic
- Sterilized by irradiation SAL10-6 (ISO11137)
- Shelf Life: 3 years after month of production
- Manufactured in a class 100,000 room environment
- Manufactured under ISO13485 and ISO9001 quality management system

# **Pipette Controller**

# **Pipette Controller**

## Adjustable aspirate liquid and dispense liquid volume.

Adjustable pipetting volume. No need to staring at the liquid surface. Meet your need within a simple touch.

# Light pressing, without pressing switch

Regular button pressing strength of a normal auxiliary liquid suction device is 1000g. Long-time pressing will make fingers tiring. This pipette controller is only 110g. A simple light touch will be enough for imbibition, pipetting, dispense, and mix.

# A kind of pipette which can incline to do imbibition and drainage while without influencing the precision

Pipette can incline to do imbibition and drainage, while no damage will be done to its precision. Different with regular suction device which needs vertical liquid pipette, but complete imbibition, drainage, and separation according to scales.

## Operating space is reduced 50%

To the unreasonable product structure caused by the narrow space of biological safety cabinet and the U-shape design, GVS pipette controller uses V-shape structure which makes the gravity center of the liquid pipette closer to user's hand and effectively lower the height of spreading elbow when doing liquid relief and reduces user's tiring level. Adjustable liquid pipette can meet various requirements of different experiments and coordinate with laboratory technicians' height to best condition.

## 4 modes, precise pipetting

Includes free mode, manual mode, liquid distribution mode, and mixed-blowing mode. This the first pipette controller which can set status of liquid imbibition and liquid separation.

## Structure renovation. The pipette controller with no returning liquid.

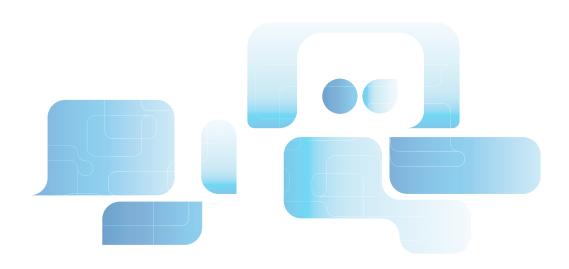

With a better structure design comparing to regular pipette tube and auxiliary liquid suction device, motor control of high precision, and compressor structure of accurate positioning, the controller does not have any possibility of returning liquid.
