

# ENVIRONMENTAL POLICY

The Management of GVS S.p.A. considers quality of life and respect for the environment to be not only a fundamental right, but also a strategic means of satisfying stakeholders. It believes that it is able, in the course of all its management activities, to limit, if not avoid, forms of waste, thus ensuring the organisation's competitiveness and innovation in the short, medium and long term.

The company therefore declares its commitment to create, implement and maintain an environmental management system that focuses on:

- Compliance with applicable legal requirements, as well as with the limits defined within GVS itself
- Compliance with all regulations, codes of conducts and agreements, already signed or in progress, which may influence environmental matters relating to the company
- continuous improvement of its environmental performance based on its ability to control and/or influence
- prevention of pollution related to its activities/products both inside and outside the site

In order to pursue the above, the Management has defined the following objectives:

- Qualify staff and give them a sense of responsibility and greater awareness, involving them in the implementation of the system and motivating them to pursue set environmental objectives
- Introduce and maintain all actions necessary to ensure that its activities comply with legal obligations
- Improve working conditions with regard to health and safety issues and the prevention of accidental and emergency situations which can have negative effects on the external environment and/or on health and safety conditions at work;
- Optimize the consumption of resources through monitoring and technological improvement;
- Optimize waste production, reducing the quantity produced
- Involve its suppliers of goods and services in the common goal of environmental improvement
- Involve its suppliers in the proper management of substances subject to the REACH regulation, guaranteeing them regular and constant communication in this regard

The specific objectives will be annually defined by the Management and communicated to heads of department.
